To whom it may concern

Letter of Recommendation for GLASSCON

Dear all

This letter is to acknowledge and highly commend GLASSCON as a high profiled façade expert for Façade Engineering, Consulting & Contracting services

In our capacity as real estate investment company, PRODEA Investments was pleased to have GLASSCON as a façade engineer & subcontractor of the main contractor for our project "NEW FIVE-STORY OFFICE BUILDING COMPLEX WITH GROUND FLOOR STORES AND UNDERGROUND PARKINGS ON FRAGOKOKLISIAS STREETS NO. 6, AIGIALIA, K. AITOLOU IN THE MUNICIPALITY OF AMAROUSI, ATHENS" and specifically for the architectural building envelope works "Design, Procurement and Installation of motorized aluminum perforated solar louver system". Their services included the design, value engineering, manufacturing and installation of an exterior motorized solar shading system made with perforated louver airfoils. After the finalization of the custom system design, GLASSCON proceeded successfully with the testing and CE certification of the system according to EN 13659:2008-10.

During the whole process, GLASSCONs team worked harmonically and productive with all parties involved like architect, developer, main contractor and demonstrated high reliability & efficiency, professionalism and overall client satisfaction.

Sincerely,

Dimitris Georgiopoulos

Head of Technical Department
